

# 8128H

WHEEL LOADER

 **LIUGONG**

TOUGH WORLD. TOUGH EQUIPMENT.

# 8128H SPECIFICATIONS >>>

MAIN SPECIFICATION	
Operating Weight	50,600 kg
Gross Power	391 kW (525 hp)
Standard Bucket Size	7 m <sup>3</sup>
Loading Capacity	12,000 kg
Max. Pull	358 kN
Standard breakout force	385 kN
Fastest Total Cycle Time	13.2 s
Dump Height at Full Discharged	3,910 mm
Configuration	Cummins QSK19 Tier3 Engine/DANA transmission and torque converter/Kessler axle/Parker pump and valve/Standard boom/CFC-free air conditioner/Auto central lubrication/Grammer seat
Features	<p><b>High Power Performance</b></p> <ul style="list-style-type: none"> <li>• Multiple engine models: economic, standard, powerful</li> <li>• Perfect match of Cummins electronic controlled engine and ZF full-automatic transmission achieve great performance in severe heavy loading;</li> <li>• ZF axles with slip limited differentials.</li> </ul> <p><b>Efficient Hydraulic System</b></p> <ul style="list-style-type: none"> <li>• Load-sensing hydraulics with piston pumps</li> <li>• Electrical proportion valve applied in finger lever control</li> <li>• Fully hydraulic wet discs brake with dual pedals</li> </ul>
